Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**METHOD FOR DETERMINING ADDITIONAL FUEL
CONSUMPTION IN A MOTOR VEHICLE AND METHOD
FOR DISPLAYING ADDITIONAL FUEL CONSUMPTION**

RESTRICTION

The Examiner first notes that claim 10 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must only refer to other claims in the alternative. See MPEP § 608.01(n). Accordingly, claim 10 has not been further treated on the merits.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, the Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Restriction is required under 35 U.S.C. 121 and 372.

Art Unit: 2855

Group I, claims 1-7 which are drawn to a method for determining the fuel consumption in a motor vehicle.

Group II, claims 8 and 9 which are drawn to a process for display of fuel consumption.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features because Group I does not require the display of fuel consumption and Group II does not require the determining of fuel consumption as spelled out by Group I.

The Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should the Applicant traverse on the ground that the inventions or species are not patentably distinct, the Applicant should submit evidence or identify such evidence now of

Art Unit: 2855

record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
